Re: SPS New England Solar Canopy Carports

Dear Planning Board,

BlueSel Commercial Solar is working with SPS New England, regarding a proposed Solar Canopy Carports project to be located at 98 Elm Street.

There is an open application for expanding the rear parking lot and we are inquiring as to the process necessary to add two Solar Carport Canopies to the plan.

Please see the attached layout and renditions of the proposed structures. They will face south toward the rear of the existing building with the panels mounted at a 10 degree angle. The drive clearance height is 11 feet. There will be seven galvanized steel posts with foundations supporting the two structures.

I will look forward to hearing from you at your earliest convenience regarding your review and required actions to move forward with the project.

Best Regards,

Rob Rollins
Director Business Development
